

### REFRIGERATION SOLUTIONS

## Semi-vertical multideck

## **TECTO SV5**

A floor space-efficient mid-floor merchandiser

# Reliable high performer

The Tecto SV5 is a new space-efficient semi-vertical multideck delivering a number of customer benefits. Designed on the same platform as the Viessmann MD5 and MD7 multidecks, the Tecto SV5 delivers more pro-duct volume for the same footprint compared to previous semi-verticals. Unified product design enables high visual impact throughout the store.

The low height of the semi-vertical cabinets provides great visibility over the store making shopping convenient for consumers. The geometry of the SV5 upper shelf provides more room for products to be displayed. Viessmann's evaporator design delivers high performance even in the toughest conditions. These are just some of the benefits that make Tecto SV5 the ideal solution for mid-floor merchandising.

### Space-efficient Viessmann design

The Tecto SV5 has a space-efficient bottom evaporator design resulting in optimal volume in relation to floor space. The cabinet range has 89 cm and 99 cm depth variants, making it a perfect match even for smaller store formats. When more volume is needed, the 99 cm model provides it in a compact foot-print.

#### An energy efficient high performer

The Tecto SV5 utilises Viessmann's evaporator design which is familiar from the MD5 cabinet. Preventing icing and securing high performance even in the toughest conditions are robust features of the MD5. The open version of the cabinet is classified as 3M1 and the door version as 3M0 combining maximum temperature performance with energy efficiency. Naturally, both the door and open versions of the cabinet have Viessmann's unique paten-

ted Encore air curtain technology as standard saving energy for the benefit of the economy and environment

# Excellent product visibility and convenient shopping

The Tecto SV5 has a new design providing shoppers with an optimised view of the groceries. It is available in two heights, 145 and 165 cm. Single and double glass doors are available as an option, ensuring a convenient shopping experience for consumers.

# Easier drainage and refrigeration piping installation

The Tecto SV5 has been designed with ease of installation in mind. Piping pre-installed in the factory makes on-site installation fast and agile, and installation time is significantly shorter. The drainage connection has been cleverly located at the front of the cabinet for easy installation and access.

# CHOOSE THE TECTO SV5 FOR

- + Great mid-floor product presentation
- + Flexibility for different store formats with 890 cm and 990 cm cabinet depths
- + Space-efficient bottom evaporator design
- + High-performance open and door cabinet
- + Easier drainage and refrigeration piping installation

External length (mm)	1875, 2500, 3750, end cabinets 1780, 1980
External height (mm)	1450, 1650
External depth (mm)	890, 990
Temperature range (°C)	0 to +2 °C and +2 to +4 °C
Refrigerants	R744 (CO <sub>2</sub> ), brine
Energy efficiency class	Open E Doors C

External height (mm)	1650
External depth (mm)	2110
Temperature range (°C)	0 to +2 °C and +2 to +4 °C
Refrigerants	R744 (CO <sub>2</sub> )
Energy efficiency class	Doors C

### CHOOSE THE TECTO SV5 PANORMA ISLAND FOR

- + Total transparency with optional 360° view crown-ends
- + Excellent view of products with maximized product capacity

## 360° view with Panorama island cabinet

SV5 panorama island offers a superior visibility for showcasing premium products. The new addition of the SV5 series has 4 rows of shelves, which have improved product display abilities. The cabinet maximises its sales potential in a sustainable way as it showcases the products from all angles from top to bottom. The cabinet comes only with single glass doors. SV5 Panorama ensures a pleasant experience for both the customer and to the store employees.
